

What was your role and what are the benefits?	<p>I was responsible for the research aspect of the project.</p> <p>It showed me how important it is for everyone to work together as one team. I got everyone involved so everyone knew how they could contribute to making it a success.</p> <p>One team didn't do any work until the last week and when all the visitors were there they just had a blank display and they were all really embarrassed.</p>
What work experience do you have?	<p>I've never had a part time job but I worked closely with the team from Hitachi for 12 weeks on the industry project I talked about earlier. I experienced a variety of different departments from concept design to manufacturing engineering.</p>
Why did you apply for this role?	<p>Because I really enjoyed the experience of working in a large organization like Hitachi and understanding how all the different departments work together. It gave a great overview of a variety of different jobs.</p>
What do you think would be most challenging about this role?	
Now is the time to sell yourself Why should we choose you?
