

Candidate:	Date:
Vacancy: Technical Apprentice	
Tell us about yourself and your interests?	
Education and Training:	
What did you like/dislike about school/college? What was your favourite subject and why?	
How would your teacher/your boss describe you? Why? How?	<p>They would say I'm a leader....</p> <p>Because when we worked on the industry projects with Hitachi I was the one who wanted it to succeed so I encouraged my team to work hard on it.</p> <p>I delegated tasks to different people and everyone understood the part they had to play.</p>
Describe a project you have been involved in.	<p>An industry project with Hitachi Rail.</p> <p>We had to design a train from scratch, taking into account different customer requirements and then pitch as to why ours should win the funding.</p> <p>We had to understand all the different aspects that come in to building the train with lots of planning and preparation, which I now understand are vital for a project to succeed.</p>
Give an example of when you have worked in a team.	<p>I worked on an industry project with Hitachi and we had 12 weeks to work on the project that we then presented to over 100 people.</p>
