Educational assessment

a process in which 'evidence of [learners'] performance or attainment is elicited, interpreted, and acted on in some way'
(Dylan William, Paul Black)

Teachers are doing educational assessment ***all the time***

Why is it effective?

...because it's based on an understanding of ***how students learn***

Digital tools, used well, can support informal assessment (to **help students learn**), as well as formal assessment (to **certify what they've learnt**)

1. Digital interfaces

→ Exam components as well as classroom tools

2. Accessibility and inclusiveness

←

→ New ways to make assessments work for all

3. AI used wisely

→ Task generation; marking; feedback

4. Edtech based on Ed

←

→ New ways for assessment to support learning

5. Assessment ≠ numbers

←
